**Organic Trust Australia –
Research and Education**

About OTARE

Organic Trust Australia - Research and Education was established in 2009 to enable the organic industry and others interested in organic farming to invest in scientific research and education relevant to organic and bio-dynamic management systems.

The Trust has charitable trust status, so donations are tax-deductible. Your investment will accelerate the development and uptake of organic farming practices within Australia, thereby underpinning not only the long-term sustainability of Australia's food production systems but also health and environmental outcomes from the food system.

Board of Trustees

Mr Tim Marshall (chair)

Consultant horticulture, author

Ass. Prof. Paul Kristiansen

Agricultural scientist, University of New England

Ms Liz Clay

Organic vegetable farmer, Victoria

Ass. Prof. Sarah Wheeler

Economist, University of Adelaide
